EIS Process Documentation

In order to submit a workstation-related request in EIS, you need to have the RACF ID/User ID and the workstation location information.

Note: For a high-level overview of the on-boarding, off-boarding or transfer (including hotel) processes, see Boarding Process Flows.

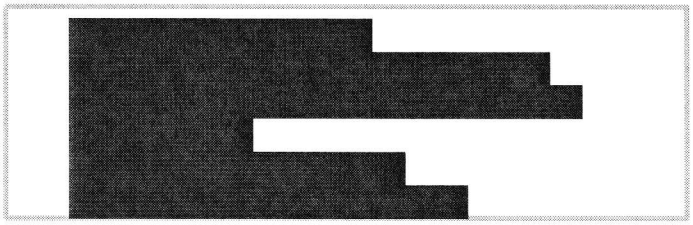

Workstation Options

The following table identifies the workstation options you may be asked to perform.

Note: You typically use: Contractor Workstation – Offshore Transfer to Riverwoods or Contractor Workstation – Transfer to Offshore for Infosys, and Standard Workstation – Add or Standard Workstation – Remove for other contractors or for employees.

To...	Select...
Assign an Infosys contractor a workstation	Contractor Workstation – Offshore Transfer to Riverwoods
Assign a new employee or non-Infosys contractor a workstation	Standard Workstation – Add
Release a workstation for an Infosys contractor transferring offshore	Contractor Workstation – Transfer to Offshore
Release a workstation for a contractor or employee who is no longer employed with Discover	Standard Workstation – Remove
Request an internal transfer (to another floor, building, etc.)	Standard Workstation – Move
Transfer an employee to a Hotel	Hoteling Workstation – Transition to Hoteling
Transfer an employee from a Hotel to a workstation	Hoteling Workstation – Transition to Riverwoods
Release a Hotel for an employee who is no longer employed with Discover	Hoteling Workstation – Terminate Assignment

For questions regarding EIS requests, contact [redacted], [redacted]

Procedures Contained in this Document

This document contains detailed process information for these workstation-related procedures:

- Contractor Workstation – Offshore Transfer to Riverwoods
- Contractor Workstation – Transfer to Offshore
- Standard Workstation – Add
- Standard Workstation – Remove

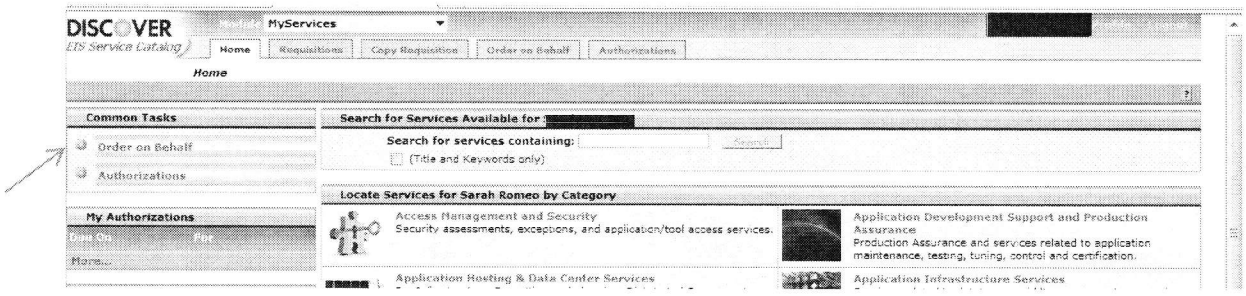

Note: The procedures listed are the ones typically used for on-boarding and off-boarding contractors and employees. Other options, such as moving or hoteling, are similar.

IMPORTANT: The instructions provided in this document use the cost center and billing information for individuals for whom [redacted] is the manager. If [redacted] is not the manager, obtain the cost center information from the requesting manager.

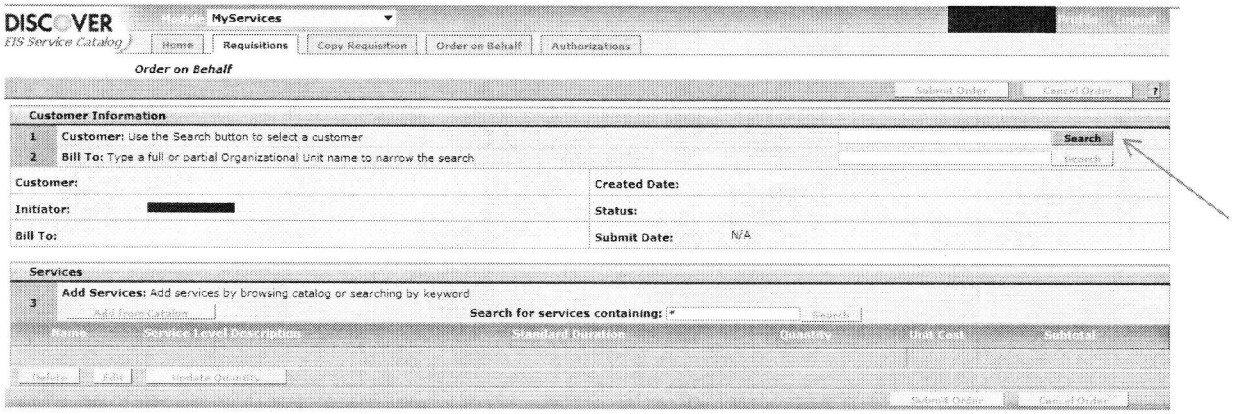

Contractor Workstation – Offshore Transfer to Riverwoods

Follow these steps when on-boarding an Infosys contractor from offshore:

1. Launch the EIS Service Catalog and log in using your RACF ID and password.
2. Click the Order on Behalf button under the Common Tasks header.

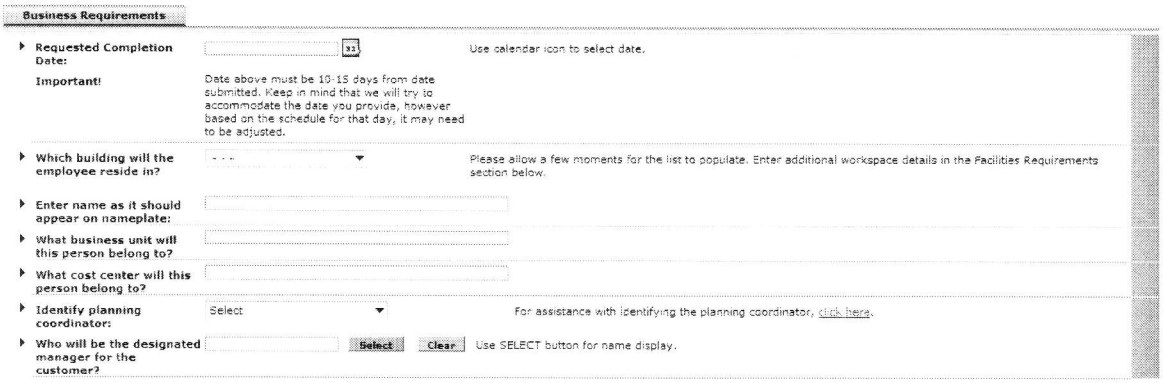

3. Customer Information section:
   a. Click the orange Search button in the Customer line.

   b. When the Select Person window appears, enter criteria to search for the individual and click **Search**.
   c. When a list of names appears, select the radio button next to the name of the individual and click **OK**. The Select Person window closes and the Customer and Bill To information are populated.
4. Services section:
   a. In the Search for service containing box, type 'Workstation' and click **Search**.
   b. Locate the 'Contractor Workstation – Offshore Transfer to Riverwoods' option.
   c. Click **Order** next to the option (on the right). **Note:** If you click the option name, you will be given a full description of the option and will need to click **Proceed to Order**.
5. The order page appears with the Customer and Initiator information already populated.

6. Business Requirements section:

   a. Enter the requested completion date, keeping in mind the time frame mentioned in the Important! message for this field.
   b. Select the building where the workstation is located: [redacted]
   c. A new field will appear asking for the floor section: [redacted]
   d. Another new field will appear asking for the room/cubical. Select the workstation ID you picked from the Otis PMO Support Team Cubical Assignments spreadsheet.
   e. Type the name of the person assigned to the workstation (or the preferred name, if known) for the Name plate at the workstation.
   f. Type the business unit for the person: [redacted]
   g. Type the cost center ID: [redacted]
   h. For the planning coordinator, select [redacted].
   i. For the designated manger, click **Select** and search for [redacted] The manager's information, including the cost center, will populate.

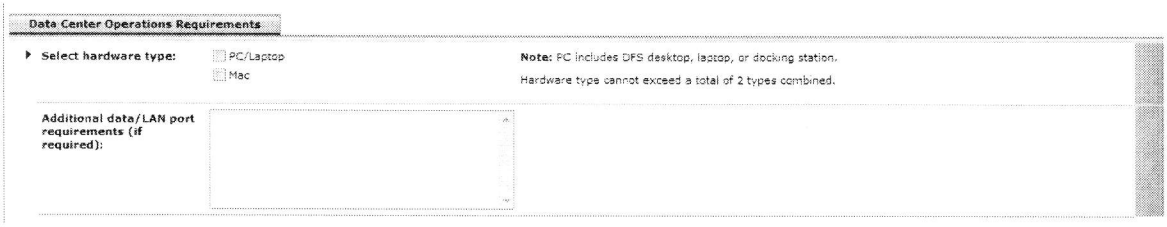

7. Telephone Requirements section:

   a. Click the No radio button for the zero out of voicemail option.
   b. Select the check box for the Continental restriction.

8. Skip the Call Routing Requirements section.
9. Skip the Telephone Feature Requirements section.

10. In the Data Center Operations Requirements section, select the check box for PC/Laptop.

11. In the Facility Requirements section:

    a. For the title, select 'Contractor'.
    b. Enter any significant/special comments in the comment box. For example, Otis BT Infosys Support.
12. When finished, click **Submit Order**.
13. An email will be sent to [redacted] to approve the request.
14. An email will be sent to you from the EIS service team.
